

Adding Adobe Acrobat extension to Chrome and Firefox browsers

Google Chrome

- 1) Open google chrome .
- 2) In the upper-right corner of the Chrome toolbar, click the Chrome menu icon ,
⋮
- 3) Choose More Tools > Extensions. Or type `chrome://extensions/` in the Chrome address bar and press Enter.
- 4) To turn on the Adobe Acrobat extension, click the toggle button.
- 5) Close the page when completed

Acrobat Create PDF extension is used to convert web pages to pdf. Enabling this extension adds the Acrobat PDF Creation toolbar and the right-click context menu to convert complete web pages, links to PDF.

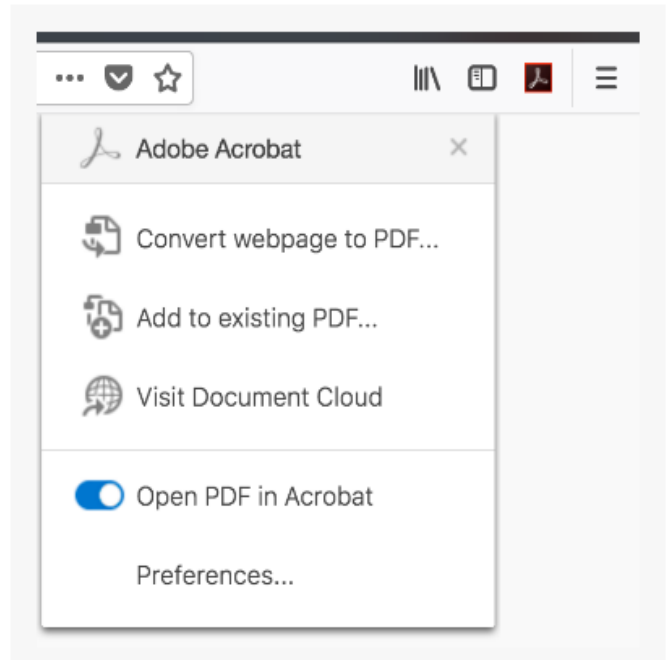

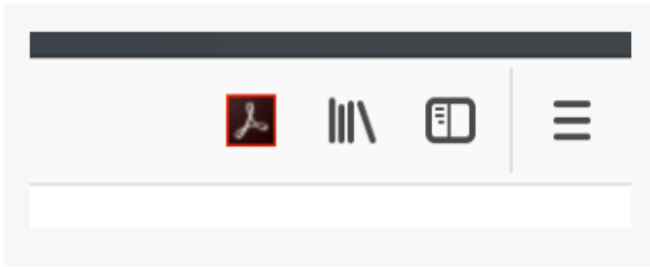

Steps to enable Acrobat Create PDF extension in Firefox

- 1 Launch Mozilla Firefox.
- 2 On Windows, click the **Alt** key to bring up the Firefox menu bar. On Mac OS, it's already there.
- 3 Go to *Tools -> Add-ons*.
- 4 The Add-ons manager is displayed. Select **Extensions** in the left pane. An extension named **Adobe Acrobat** appears as disabled with an Enable button beside it (as shown in the snapshot below).

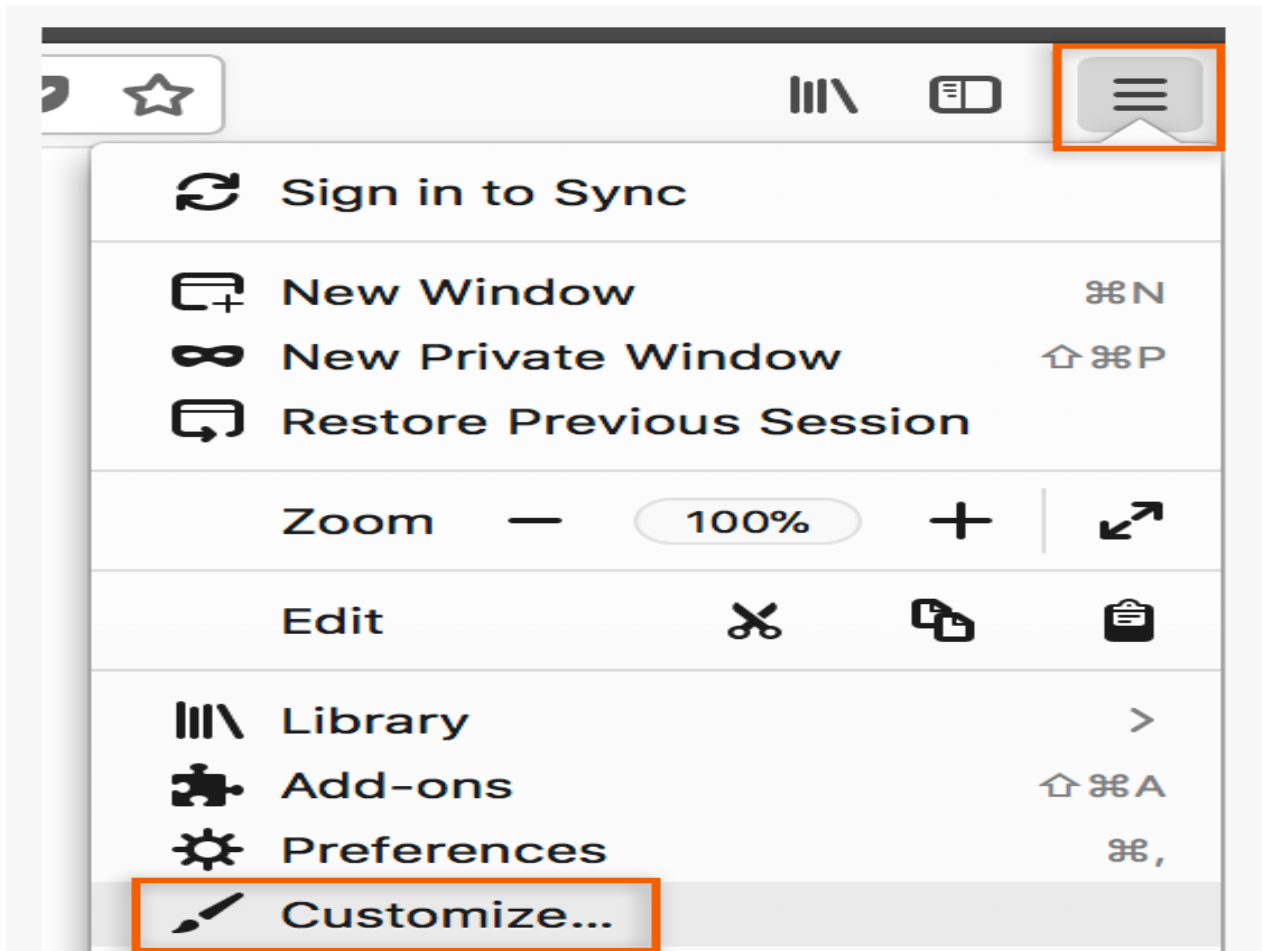

- 5 Click the **Enable** button for *Adobe Acrobat – Create PDF* extension.
- 6 Restart Firefox.

The Create PDF extension toolbar and the right-click context menu are now enabled (as shown in the snapshot below). Use them to convert web content to PDF.

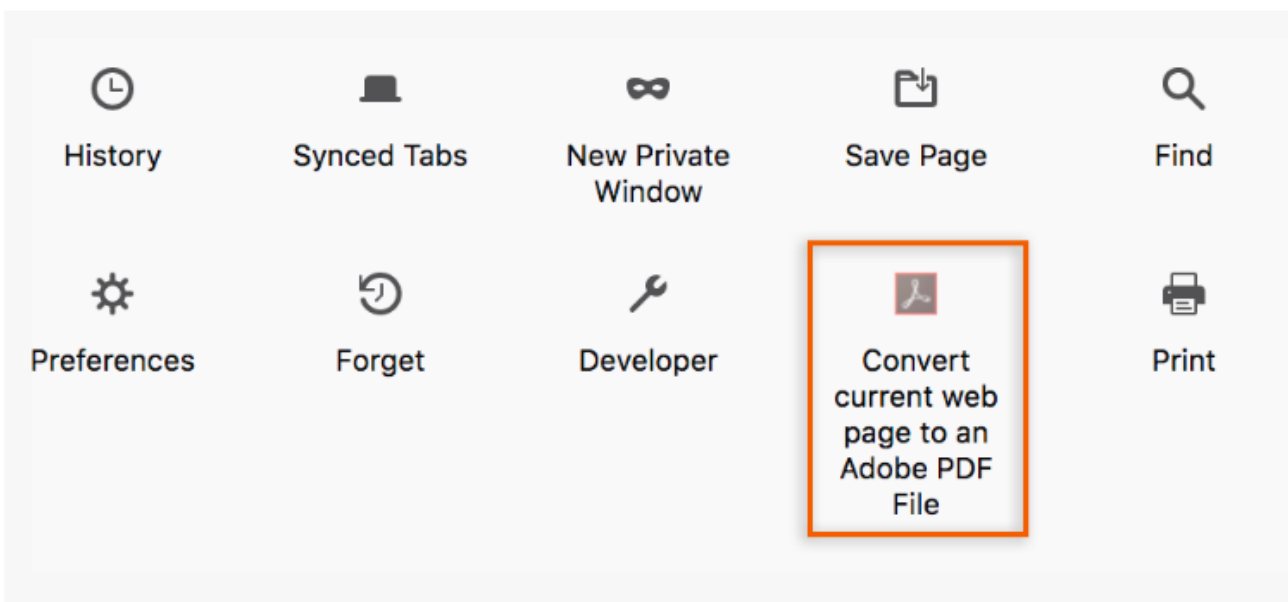

If the extension toolbar is not available, do the following:

- 1 Go to *Firefox menu > Customize*.

- 2 Drag and drop the Acrobat extension icon from *Additional Tools and Features* pane to the Firefox menu panel.

- 3 Click **Exit Customize**. The extension toolbar is now available on the Firefox menu panel.
